

Jockimo™

Advanced Architectural Products

ImagenGlass™

Jockimo ImagenGlass™ is high quality imagery applied to PET foil, utilizing special photographic quality dyes, which is laminated inside of glass to meet ASTM standards. Other products appear grainy or dirty due to the printing processes used but ImagenGlass™ provides a higher quality color range and color intensity than any conventional printing process. The ImagenGlass™ process provides a depth of color unlike any other printed image glass product on the market and enables interior designers and architects to fulfill their wildest dreams in the field of imagery in glass. ImagenGlass™ can be fabricated in thicknesses of 5/16", 3/8", 1/2", 3/4", 1", etc., for the desired strength, depending on the application. It can also be provided as insulated glass units, glass flooring, fire rated glass, and other specialty decorative glasses. Maximum image size - 56" wide, 120" long.
